## **DETAILED ACTION**

### ***Reasons for Allowance***

1. Claims 19-25 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art of record fails to disclose or suggest the device claimed by applicant. In particular, the prior art fails to disclose or suggest an extracorporeal circuit with blood and filtrate passages and tubes, filter, biosensor, and pump as claimed, in combination with a controller programmed to execute the claimed control algorithm that manipulates a feedback signal, feedback signal threshold, and a baseline feedback signal, along with the other steps and limitations of the claims.

Applicant's recitation that the controller is "programmed to" execute the claimed control algorithm comprises a structural limitation, requiring the prior art to perform the same function claimed by applicant in order to anticipate the claim. The best prior art of record, US 6,471,872 to Kitaevich, discloses the device substantially as claimed by applicant, but fails to disclose or suggest the control algorithm claimed by applicant.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
